

# BEAN MOSAIC

## Materials

- White glue
- Various beans and seeds such as corn, soybeans, sunflower, squash, popcorn, split green peas, etc.
- Bean mosaic design

## DIRECTIONS

**Teach students about different types of beans and seeds while creating a mosaic.**

1. Identify and sort beans and seeds by type.
2. Copy or trace the Bean Mosaic design onto cardboard or posterboard. The design can be enlarged if you wish, or you can create your own design.
3. Spread a thin coat of glue evenly (no puddles!) over one area of the design at a time. You can do more than one area at a time if they use the same type of beans or seeds.  
  
Press the beans firmly to the paper, using a toothpick to align them more closely together.
4. Let glue dry and display.
