

DIRT PUDDING

Materials

- Clear plastic cups
- Vanilla cookies, crushed
- Vanilla pudding
- Graham crackers, crushed
- Butterscotch pudding
- Chocolate cookies
- 1 gummy worm
- Chocolate pudding
- Shredded coconut
(either toasted or dyed green to represent grass)

DIRECTIONS

This edible project helps students understand the layering of organic material and rocks which make up dirt.

Have students layer ingredients in their cups as follows:

- 1/4" layer of vanilla cookie
- 1/2" layer vanilla pudding
- 1/2" layer graham cracker
- 1/2" layer butterscotch pudding
- 1/4" layer chocolate cookie
- 1 gummy worm laid on top of the layers, surrounded by
- Coconut "grass"

Before eating their "dirt," students should draw a soil profile of their dessert, showing the different layers.

NOTE: remember to check for food allergies before allowing students to eat their projects.
