

2023

WORKSHOPS: Bring Agriculture into Your Classroom

Pre-K through 12th Grade Teachers,

Grow your curriculum with Louisiana Ag in the Classroom, and sow seeds of curiosity and understanding of our food, fiber and fuel systems among your students.

Attend one of our FREE Ag in the Classroom (AITC) Workshops this fall to learn how you can plant an appreciation for agriculture in the next generation.

Our workshops provide educators with training and resources to integrate agriculture into existing curriculum. New ideas and materials, hands-on activities and lessons aligned to Louisiana State Standards are shared at our comprehensive workshops. Educators also have a chance to win prizes!

Certificates for Continuing Learning Units (CLUs) are provided; however, AITC cannot guarantee that local education agencies or other organizations will accept these CLUs for credit.

While workshops are free, preregistration is required. For a complete list of 2023 workshops, more information or online registration, visit www.aitcla.org.
